TABLE OF CONTENTS FOR YEAR 11 MATHEMATICS COURSES

YEAR 11 SPECIALIST MATHEMATICS

CHAPTER 1: COUNTING

		WACE syllabus reference
A	The product principle	1.1.2
B	Counting paths	1.1.2
C	Factorial notation	1.1.3
D	Permutations	1.1.1, 1.1.3, 1.1.4
E	Combinations	1.1.7, 1.1.8
F	The Inclusion-Exclusion principle	1.1.5
G	The Pigeonhole principle	1.1.6

CHAPTER 2: CIRCLE GEOMETRY

A	The angle in a semi-circle theorem	1.3.6, 1.3.14
B	The chord of a circle theorem	1.3.10
C	The radius-tangent theorem	
D	The angle at the centre theorem	1.3.7
E	Angles subtended by the same arc	1.3.8
F	Tangents from an external point	
G	Angle between tangent and chord	1.3.11
H	Cyclic quadrilaterals	1.3.9, 1.3.14
I	Intersecting chords and secants theorems	1.3.12, 1.3.13, 1.3.14

CHAPTER 3: VECTORS

A	Vectors and scalars	1.2.1, 1.2.2
B	Geometric operations with vectors	1.2.3, 1.2.4
C	Vectors in the plane	1.2.5, 1.2.6, 1.2.7
D	The magnitude of a vector	
E	Operations with plane vectors	1.2.8, 1.2.9
F	The vector between two points	
G	Parallelism	1.2.12
H	Problems involving vector operations	1.2.14
I	The scalar product of two vectors	1.2.10, 1.2.11
J	The angle between two vectors	1.2.12
K	Vector projection	1.2.13
L	Proof using vector geometry	1.3.16, 1.3.17, 1.3.18

CHAPTER 4: TRIGONOMETRIC FUNCTIONS

A	The general tangent function	2.1.2
B	General trigonometric functions	2.1.2
C	Reciprocal trigonometric functions	2.1.4
D	Solving trigonometric equations	2.1.1
E	Modelling using trigonometric functions	2.1.9
F	Trigonometric relationships	2.1.5
G	Double angle identities	2.1.3
H	Angle sum and difference identities	2.1.3, 2.1.6, 2.1.7, 2.1.8
I	Trigonometric equations in quadratic form (Extension)	

CHAPTER 5: MATRICES

A	Matrix structure	2.2.1
B	Matrix operations and definitions	2.2.2
C	Matrix multiplication	2.2.2
D	The inverse of a 2×2 matrix	2.2.3
E	Simultaneous linear equations	2.2.3, 2.2.11
F	Translations and lines in 2-D	2.2.4
G	Linear transformations	2.2.5
H	Rotations about the origin	2.2.5, 2.2.6
I	Reflections	2.2.5, 2.2.6, 2.2.9
J	Dilations	2.2.5, 2.2.6, 2.2.9
K	Compositions of transformations	2.2.7, 2.2.10
L	The inverse of a linear transformation	2.2.8

CHAPTER 6: MATHEMATICAL INDUCTION

A	The process of induction	2.3.4
B	The principle of mathematical induction	2.3.4
C	Proof of divisibility	2.3.5, 2.3.6
D	Proofs for sequences and series	
E	Proofs for products	
F	Induction with matrices	
G	Proof of inequalities	

CHAPTER 7: REAL AND COMPLEX NUMBERS

A	Interval notation	
B	Rational numbers	2.3.1, 2.3.2
C	Division by surds	
D	Irrational numbers	2.3.3
E	The ‘invention’ of imaginary numbers	2.3.7, 2.3.14, 2.3.16
F	Complex numbers	2.3.8, 2.3.10
G	Complex conjugates	2.3.9, 2.3.15
H	Complex numbers as 2-D vectors	2.3.11, 2.3.12, 2.3.13
I	Modulus
