

**Changes to the Cambridge IGCSE International Mathematics (0607) Extended syllabus:**

- Quadratic inequalities have been added to the Algebra section.
- The alternate segment theorem has been added to the Geometry section.
- Pictograms have been added to the Statistics section.
- Histograms with frequency density have been removed from the Statistics section.
- Other minor changes have been made to the wording of the subject content, as well as to the names and order of the sections of the subject content.
