

The content has been updated to reflect the changes to the syllabus for first examinations in 2020.

The main changes to the content are:

- Sets and Venn diagrams have been removed.
- Matrices have been removed.
- Sequences and series have been added.
- Modulus equations and inequalities have been added.
- Integrating $1/x$ and $1/(ax+b)$ has been added.
- Graphing cubic polynomials has been added.
- Relative velocity has been removed.

In addition, much of the text and questions have been rewritten, so that students can progress from this course to our A Level or IB Diploma Programme textbooks, without encountering repeated material.
